

VII. IRREVERSIBLE AND IRRETRIEVABLE COMMITMENT OR RESOURCES

The proposed project would involve a commitment of resources. Such resources would include, but are not limited to, construction material including paint, timber, steel, asphalt, and concrete. There would also be both short- and long-term commitments to the use of fossil fuels, electricity, and water.

Also inherent in the development plans would be a commitment of labor on-site during construction. It is anticipated that there would be 75 construction jobs created as a result of the proposed action. Upon completion of construction, it is anticipated that some additional on-site labor would be required. There would be an increase in 2 off- and on-season, and 13 on-season jobs, for a total of 15 on-season jobs due to the proposed action.
